

CONSERVATION STEWARDSHIP AWARD

Sussex Conservation District (SCD), the delegated authority for Delaware Sediment and Stormwater Regulations in Sussex County, is accepting entries for the inaugural Conservation Stewardship Award. This award will recognize organizations in various categories that have exceeded regulations to prepare, protect and preserve sensitive natural resources in the county.

Entries will be accepted in the following categories:

<u>Developer</u>	<u>Design Team</u>	<u>Home Builder</u>	<u>Homeowner Association</u>	<u>Site Contractor</u>
Residential Commercial	Engineer Surveyor Other	1-50 homes per year 51+ homes per year	Open Space Management Stormwater Management	Residential Commercial

SCD, through its recognition and appreciation of these organizations, hopes to catalyze future voluntary conservation and encourage residents to choose conservation focused organizations.

To qualify, projects must be located in Sussex County and initiated or completed in the past 24 months.

To enter, complete the appropriate entry form and submit by:

email

siobhan.kelley@sussexconservation.org
Subject: Conservation Stewardship

mail or in person:

Siobhan Kelley
Attn: Conservation Stewardship Award
23818 Shortly Rd.
Georgetown, DE 19947

Multiple entries per organization are permitted. Attach additional pages, if necessary, photos and videos are encouraged.

The deadline to enter is **Monday, Nov. 15, 2021.**

A panel of judges will evaluate entries and winners will be announced in early Jan. 2022. Winners will receive the 2022 Conservation Stewardship Award and graphic. A banquet, on Thursday, Jan. 27, 2022, at Mulligan's Pointe in Georgetown, will formally recognize winners, their achievement and positive impact on the state's natural resources.

Please answer the following questions:

1. Provide background information about the project.
2. Describe how the project exceeds Delaware Sediment and Stormwater Regulations to protect environmentally sensitive areas. What was the result?
3. Describe challenges during the construction process and how they were overcome.
4. Why do you think this project should receive the Conservation Stewardship Award?
5. How was the stormwater system managed and/or open space enhanced to provide water quality benefits?
